Door Restrictor Kit

Compliance With All Standard Safety Requirements

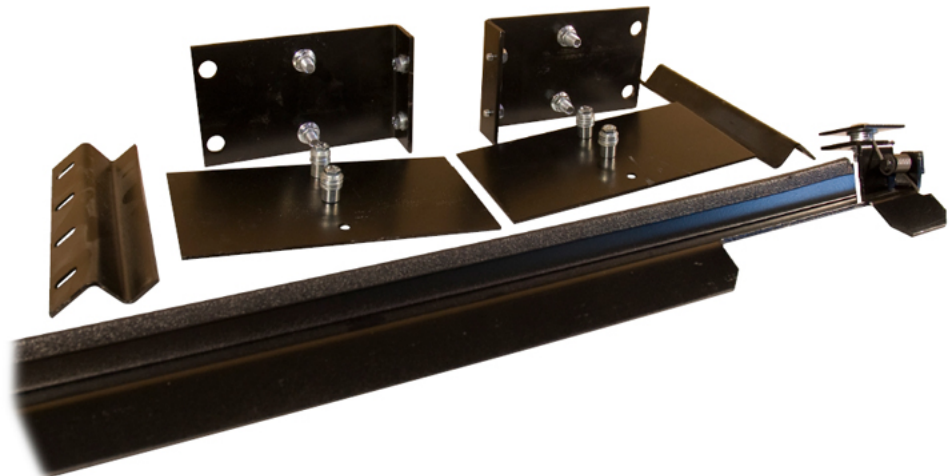

Door restrictor kits improve passenger safety, meet national and state codes, and are a sound investment for your building.

In the event that an elevator should stop between floors, it is imperative that trapped passengers remain in the elevator car until trained personnel arrive or until power is restored to the system and the car resumes normal operation. All passenger elevators must have working door restrictors to meet national codes.

Vertical Express Door Restrictor Kit
