Replacement Jacks

Precision Manufacturing

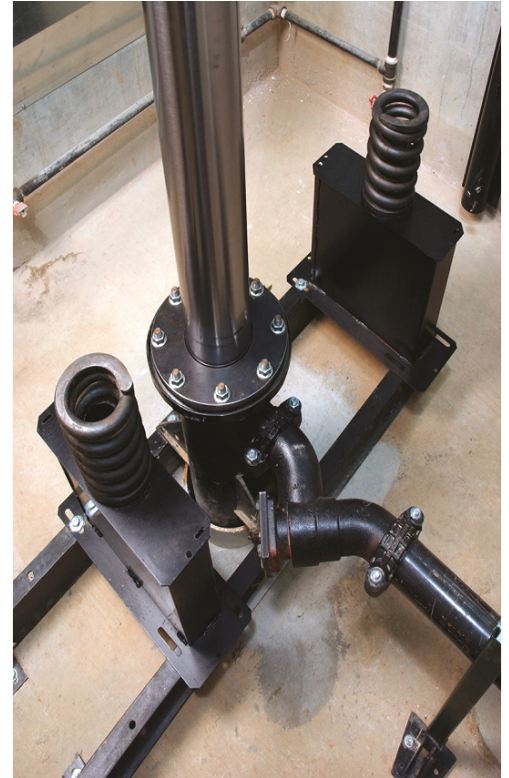

Vertical Express Replacement Jacks are turned and polished to exact specifications. The accuracy of our manufacturing process makes our jacks the longest wearing in the industry and ensures smooth elevator operation.

Custom Options

Vertical Express also provides job-specific replacement jacks, no matter the length. We locate and size the Victaulic[®] oil inlet to your job's specification.

Safety Compliance

Designed with ASME A17.1 code in mind, our replacement jacks conform to all stated codes. The corrosion protection provides a built-in moisture sensor and meets the most stringent standards used in the industry today. The assemblies include a stop ring, safety, dished bulkheads, and, upon request, a jack protection system.

Replacement Jacks Order Form

When the form is complete, send it through one of these methods:

- fax: (866) 877-8099
- email: parts@verticalxpress.com
- phone: (866) 448-3789
