Guide Shoe Assembly with Oilers

Lubricating Rails Can be Accomplished Easier and More Efficiently with our Omega Guide Shoe with Oil Reservoir.

Vertical Express' Omega Guide Shoe Assembly with built-in oil reservoir provides a continuous flow of oil to the surfaces of the rails. As the oiler passes over the rails an even and uniform flow of lubricant is applied; keeping the rails lubricated constantly. The oil provides less friction as it guides the car and counterweight along the path of the omega guide rails; less friction prolongs the life of the guides. The covered reservoir prevents spillage and is top filled externally. 30WT oil is recommended.
